- **Latest Web version is here:** yurikoles.com

Objective:

- Long term full-time remote software development contract with an open-minded company.

Key Points:

- During more than 10 years of my commercial iOS software development experience, I had developed many apps. I started in the era of iPhone 4, iOS 4 and Objective-C with MRC. After that, I adopted many newer technologies from their very beginnings, like Swift and many others.
- During last year I also gained experience of commercial cross-platfrom (iOS + Android) mobile application development with use of Flutter framework.
- My experience includes work in companies with own products, as well as outsource companies.
- Researched, designed, architected, developed and deployed many mobile projects from scratch.
- Supported, maintained, and extended many third-party mobile apps of different scale.
- As DevOps, I set up and maintained CI/CD workflows for a number of mobile and server apps and services.
- I don't like routine, so I advocate and follow DRY principle in mobile development as well as in DevOps, so I always automate routine tasks with scripts, which I develop mostly for shell, but I also use Python and Ruby for that purposes.
- My experience also includes backend development with Python/Django and Ruby on Rails.

iOS Projects:

- **Crypterium:** cryptocurrency wallet app, apps.apple.com/app/id1360632912.
- **Chevron:** gas stations mobile app companion in your pocket, apps.apple.com/us/app/id1450978468.
- **Strings:** social network based on image sharing, apps.apple.com/us/app/id1437010577.
- **Fitplan:** fitness video lessons, apps.apple.com/us/app/id1064119547.
- **DocChat:** online consultation with doctor, app.docchat.io.
- **Go Problems:** large set of Go game situations to solve, apps.apple.com/us/app/id635778548.
- **Le Bled:** helps users to learn French, apps.apple.com/us/app/id444078131.

Flutter Projects:

- **FitTrack:** fitness tracking app that integrates with a lot of custom hardware, apps.apple.com/us/app/fittrack-health/id1477782599.

Keywords:

Swift, Objective-C, Xcode, UIKit (Cocoa Touch), Auto Layout, Core Data, SQLite, JSON, XML, Plist, KVO, KVC, Blocks/Closures, GCD (multithreading), Core Location, Apple MapKit, Google Maps, Core Graphics (Quartz), XCTest, OCMock, AppStore/iTunes Connect (app publishing), Git, SVN (Subversion), Jira, Redmine, Asana, Trello, Facebook SDK, OpenCV, Dart, Flutter, Python, Ruby, Bluetooth beacons.

Education:

- Department of Computer Engineering. Donetsk National Technical University (2005 – 2009), Ukraine, donntu.edu.ua/kitaer/kafedra-ki.

Experience:

Freelance, Internet

July 2014 — Present, Remote/Freelance iOS Software Developer

- Developed a cross-platform mobile app in Flutter to track fitness progress with custom hardware, [FitTrack](#).
- Improved cryptocurrency wallet app, [Crypterium](#).
- Improved app for gas stations, [Chevron](#).
- Took part in development of social network which is based on image sharing, [Strings](#).
- Developed fitness app, [Fitplan](#).
- Took part in development of a service that allows people to get medical consultation online via text/audio/video, [DocChat](#).
- I was also involved in development of many smaller apps on different stages.

Biruz Software, Donetsk, biruza.com

August 2013 – July 2014, iOS Software Developer

- I was in a team that had developed a social network app, in which users share their shopping experience, project Bestie App.

Go interactive!, Kyiv, gointeractive.co

June 2012 – August 2013, iOS Software Developer

- Took part in development of a social network application, in which users exchange check-ins for discounts, project Fourcoins.

GrandSoftStudio, Donetsk,

June 2011 – June 2012, iOS Software Developer

- I was involved in development and support of a number of iPhone and iPad applications.
- The project that is still alive: [Le BLEED](#), which helps users to learn French.

Examples of my Swift code:

- github.com/yurikoles/GiphySearch
- github.com/yurikoles/CarsTest

Level of English:

- Upper-Intermediate.

Additional Info:

- I have required permissions to work as private entrepreneur of third simplified group (ФОП 3-я група).
